

Casing Accessories

Successful primary cementing requires centering of the casing, casing movement, and a properly conditioned hole. Our Scratches condition the hole by removing mud cake from the face of formation to ensure a good cementing bond and to prevent channeling. They also contribute to the even distribution of the cement slurry and the achievement of a complete fill.

- Their hinged design makes them easy to install.
- High strength & tempered wire.
- Improve Mud removal.
- Improve Cement placement, creating a more uniform wall thickness.
- Available Size: 4-1/2" to 20".

Wire Bristle Scratchers

Cement Baskets

Cement Basket is an effective aid in retaining and supporting the cement where weak formations and stage cementing is encountered. It is designed with Flexible Bow Springs, heat-treated under controlled conditions for maximum strength and uniformity, are welded to slip-on collars and overlapping metal fins for flexibility and strength to support long columns of cement during primary cementing operations.

Available in the size range 4 ½ " to 20 ".

This is a hinged collar featuring high strength steel wire cables looped in overlapping manner to produce an uninterrupted wiping action during pipe rotation. Available in size range 2-3/8" to 20".
